SUBJECT: Tremco Product Discontinuations & Status Changes

Dear Valued Partner,

We are writing to inform you of the following product discontinuations and status changes. These changes come following a thorough evaluation of our product portfolio, ensuring we continue to focus on solutions that deliver the highest value and innovation to our customers.

Products listed in the accompanying Product Discontinuation Chart will be discontinued at the listed warehouse location once current inventory has been depleted. Products with no inventory at the time of this announcement will be discontinued, effective immediately. Recommended replacement products are listed in the chart where applicable.

The accompanying Product Status Change Chart outlines SKUs undergoing material status changes. Because these changes affect a broad range of products, the impact on new orders may vary depending on the specific SKU and the timing of order placement. Tremco's Customer Service and Product Management teams are available to provide guidance and support regarding any affected products.

Thank you for your patience and understanding as we continue to optimize our product offerings. Should you have any questions or need further support, please contact the members of the product management team.

Sincerely,

Tremco Product Management Team

PRODUCT DISCONTINUATION CHART - NOVEMBER 2026
