RE: Fuel Surcharge Policy in Effect

With the cost of diesel nearing historical highs, we are experiencing increased fuel costs and additional surcharges from our vendors that cannot continue to be absorbed. Therefore, we will be following our fuel surcharge policy (Included in this mailing) effective **April 22, 2022**.

Current fuel surcharge will be (based off schedule) **\$30 per delivery**

(Avg. March 21, 2022 price on US #2 Diesel Retail Price of \$4.959)

Please feel free to contact us should you have any questions.

Sincerely,

Peter G. Wilhelms
Vice President, Marketing
& Product Development

Seth A Joy
Vice President, Sales

RE: Fuel Surcharge Policy

Diesel fuel and energy prices have been steadily increasing. The manufacturing community has increased their freight charges and surcharges to us based on published averages for Diesel fuel.

We will implement a fuel surcharge policy according to the guidelines the schedule below. The surcharge will be based upon the average monthly US Number 2 Diesel Retail Price published by the Energy Information Administration. @ <https://www.eia.gov/petroleum/gasdiesel/?src=email>

If the average price per gallon for the previous month exceeds \$3.25 per gallon, we will apply the fuel surcharge for the current month.

Flat Rate Fuel Surcharge per delivered Invoice

Average #2 Diesel Retail Price For Prior Month

Price per Gallon	(USD\$)
\$3.26 to \$3.75	\$12 per delivery
\$3.76 to \$4.25	\$18 per delivery
\$4.26 to \$4.75	\$24 per delivery
\$4.76 to \$5.25	\$30 per delivery
\$5.26 to \$5.75	\$36 per delivery

We understand the impact on your business fuel surcharges can cause when you have multiple trips to the same site. We have announced this schedule to help you plan for projects or clients that require a higher number of deliveries to achieve project success.

Please feel free to contact me should you have any questions.

Sincerely,

Peter G. Wilhelms
