RE: FRP Adhesive Updates

As you may be aware, the adhesive market continues to remain tight. With raw material shortages, FRP adhesive manufacturers have put all customers on allocation. Nudo is not immune to these issues. Current shortages and extended lead times have affected our supply of field adhesives.

Nudo continues to press Franklin to get material in to fill orders. We have also been in communication with several other manufactures. Many are off the market for new business. We are working to trial options for a polymer-based adhesive to offer an option to the market and will provide updates once we have the samples.

Laminated Panels is an option to help with the current situation. Our prelaminated panels can allow projects to continue without the need for adhesive in the field.

Please contact your sales manager for options and current pricing.

We sincerely appreciate your business and our relationship with you and your firm. Our goal as always is to bring you the highest quality product at competitive prices with world class customer service. Thank you for your continued support.

Sincerely,

Shane McNutt
Vice President of Sales
