Price Increase Announcement

To Our Valued Customers:

ClarkDietrich will implement a price increase nationwide effective September 1, 2026. This adjustment reflects the latest round of domestic steel mill price increases for September shipments and the continued rise in steel input costs throughout 2026.

Domestic steel costs have continued to increase as mill capacity utilization has grown. In addition, galvanized steel lead times have lengthened, zinc coating surcharges have increased, transportation costs have risen, and the availability of competitively priced imports has remained limited. Collectively, these market conditions continue to place upward pressure on the cost of steel-based products.

Updated price lists will be published to all markets prior to the effective date. As a reminder, invoice pricing is determined at the time of shipment.

We remain committed to delivering industry-leading quality, innovation, and supply performance across all markets. Updated price lists will be published prior to the increase. As a reminder, invoice pricing is determined at the time of shipment.

ClarkDietrich will continue to honor all existing quotes in accordance with our job quote policy, which can be found at the link below:
